<sup>1</sup> Some coordinates for base radio stations have been located to provide a general basis to plot locations. Some of these locations, however, are themselves a bit misleading, and as such the locations listed are as exact as can be determined.

<sup>2</sup> Several coastal patrol bases moved from an original airfield to a second location. The coordinates are for the latter base. Furthermore, the names of the location reflect the modern names (if relevant) to the location.

<sup>3</sup> Effective October 15, 1942, operational control of the CAP coastal patrol bases transferred from CAP National Headquarters in New York City, NY to the Headquarters, Army Air Force (AAF) Antisubmarine Command located at 90th Church Street, New York City, NY. The CAP bases were then organized under the 25th Wing, AAF Antisubmarine Command (based out of New York City, NY) and the 26th Wing, AAF Antisubmarine Command (based out of Miami, FL).

<sup>4</sup> CAP wartime records list the base location as 29°17'0.00"N 89°57'0.00"W, which corresponds to a location in waters north of the island. The location listed above corresponds to a point on land relative to other documentation on the base's actual location.
